Best for	Agency, Marketing Team, Solopreneur

KEY TAKEAWAYS

Strength and limitation

KEY STRENGTH

Excellent real-time collaboration and browser-based design workflow.

MAIN LIMITATION

Overkill for users who only need simple social media graphics.

WISETECHLIST VERDICT

Should you use Figma?

Figma is an excellent choice for UI, website, and product design teams that need real-time collaboration and prototyping. It is less appropriate for people who only need quick social graphics or simple marketing templates.

USE CASES

What can you use Figma for?

- UI design
- Website design
- Prototyping
- Design systems

- Team collaboration

PROS AND CONS

What to like and what to consider

WHAT WE LIKE

- Excellent collaboration
- Strong prototyping
- Great for UI and web design
- Powerful design systems
- Works in the browser

WHAT TO CONSIDER

- More complex than simple design tools
- Not focused on social templates
- Full-seat costs can add up for teams

PRACTICAL FIT

How Figma fits a small business workflow

WHAT IT IS

Figma is a collaborative design platform for interface design, prototyping, design systems, presentations, and team-based creative work. Because it runs primarily in the browser, designers, developers, marketers, and stakeholders can review and edit work together without passing files back and forth.

WHERE IT FITS

Figma fits into a small business workflow when websites, apps, landing pages, or digital products require shared design work and frequent feedback. Teams can use it to create layouts, prototypes, reusable components, and design systems while keeping comments and revisions in one place.

WHEN IT MAY NOT FIT

Figma may not be the right fit if your main need is quick social media graphics, simple marketing templates, or one-off visual assets. In those cases, a template-driven design tool such as Canva may be faster and easier.

DECISION GUIDE

Who should choose it?

GOOD FIT

Choose Figma if you design interfaces, websites, products, or prototypes with a team.

SKIP IF

Skip Figma if you only need simple social media posts, flyers, or template-based marketing graphics.
