Best for	Agency, Customer Research, Remote Team, Sales Team, Small

KEY TAKEAWAYS

Strength and limitation

KEY STRENGTH

Generous free recording and transcription combined with strong paid workflow automation, CRM integrations, and multi-meeting intelligence.

MAIN LIMITATION

Many of the most valuable AI, CRM, reporting, and sales-intelligence features require Pro or Business plans.

WISETECHLIST VERDICT

Should you use tl;dv?

tl;dv is a strong choice for teams that want meetings to become searchable, shareable knowledge rather than isolated transcripts. The free plan is unusually useful for capture, while paid plans add deeper AI notes, integrations, CRM automation, and multi-meeting intelligence.

USE CASES

What can you use tl;dv for?

- Remote meetings
- Customer interviews
- Sales calls

- Team knowledge
- CRM meeting sync
- Multi-meeting research and reporting

PROS AND CONS

What to like and what to consider

WHAT WE LIKE

- Unlimited recordings and transcripts on Free
- Zoom, Google Meet, and Teams support
- Multilingual transcription
- CRM automation on Pro
- Global search and AI notes
- Multi-meeting insights and sales features on higher tiers

WHAT TO CONSIDER

- Advanced AI usage and CRM workflows require paid plans
- Business features can be more than simple note-takers need
- Free plan has AI and retention limits
- Not designed for every conferencing platform

PRACTICAL FIT

How tl;dv fits a small business workflow

WHAT IT IS

tl;dv is an AI meeting notetaker and meeting-intelligence platform that records and transcribes Zoom, Google Meet, and Microsoft Teams calls. It creates summaries, clips, searchable transcripts, AI notes, and cross-meeting insights, with integrations that can send meeting information into CRM and other business tools.

WHERE IT FITS

tl;dv fits a small business workflow when meetings are shared knowledge rather than private notes. Remote, sales, and research teams can record calls, search past conversations, share key moments, automate CRM updates, and generate insights across multiple meetings instead of reviewing recordings manually.

WHEN IT MAY NOT FIT

tl;dv may not be the right fit if the business only needs basic transcription for a few meetings each month. Its workflow, CRM, and multi-meeting capabilities create the most value when meeting volume and collaboration needs are high enough to justify them.

DECISION GUIDE

Who should choose it?

GOOD FIT

Choose tl;dv if your team records many meetings and needs to search, share, analyze, or route meeting insights into CRM and collaboration workflows.

SKIP IF

Skip tl;dv if you only need occasional transcripts and do not expect to use team search, CRM automation, AI reports, or multi-meeting workflows.
